DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the Internet must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 - 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 01/06740 (Duffy et al.).

With respect to claims 1 – 22, note that the claimed limitations are clearly shown in at least Figs. 1 – 7. Note also, claim 1 of Duffy et al. Duffy et al. do not explicitly recite intranet, Duffy et al. teach WAN IP network, which could be an intranet. It would have been obvious to one of ordinary skill in the art to have incorporated an intranet into the Duffy et al. method and system, as such would have only entailed the substitution of one known IP network for another.

In addition, Duffy et al. does not explicitly recite a soft phone, but do recite IP phones. It would have been obvious to one of ordinary skill in the art to have incorporated soft phones into the Duffy et al. system and method, as such would only entail the substitution of one IP phone for another.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:
